W7: Strategic Information Systems

Strategic Information Systems in Fashion Retail *in* Retail

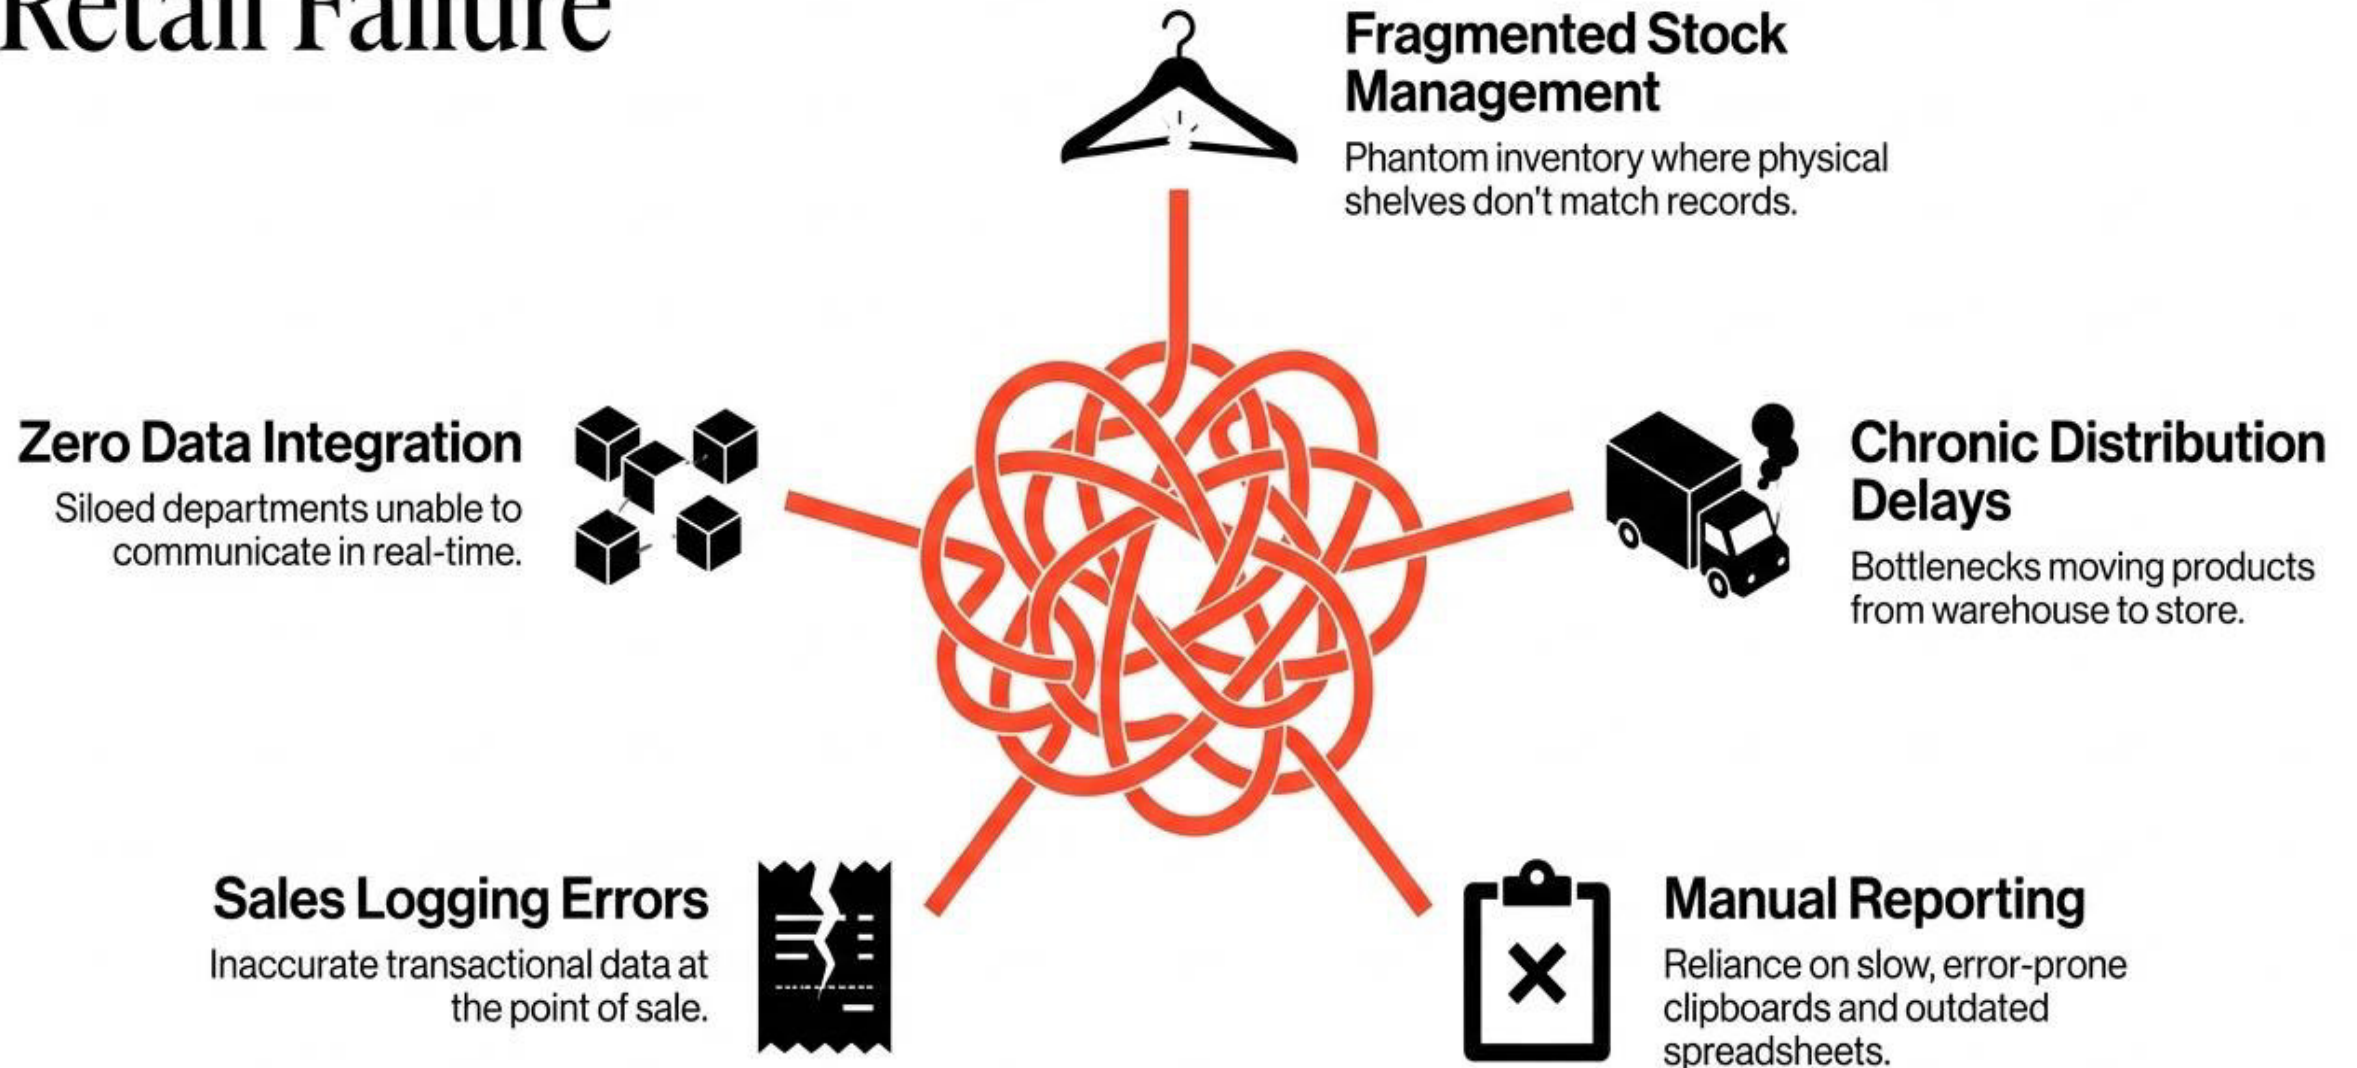

Navigating the Ciputra Creative Fashion Enterprise via Project-Based Pedagogy

The modern fashion industry is defined by speed, but crippled by systemic backend chaos

Front-end retail relies on rapid trends. Backend logistics relies on outdated, manual systems.
To survive, modern fashion requires strategic information systems.

The Anatomy of Retail Failure

The Operational Cost of Manual Systems

	Siloed / Manual	ERP Integrated
Inventory Tracking	Periodic manual counts	Real-time digital synchronization
Financials	End-of-month reconciliations	Instant transactional updates
Distribution	Guesswork and reactive shipping	Data-driven logistics
Strategic Output	Blind intuition	Evidence-based decision making

Stepping into the Ciputra Creative Fashion Simulation

The Mission

You are stepping into a rigorous Project-Based Pedagogy environment.

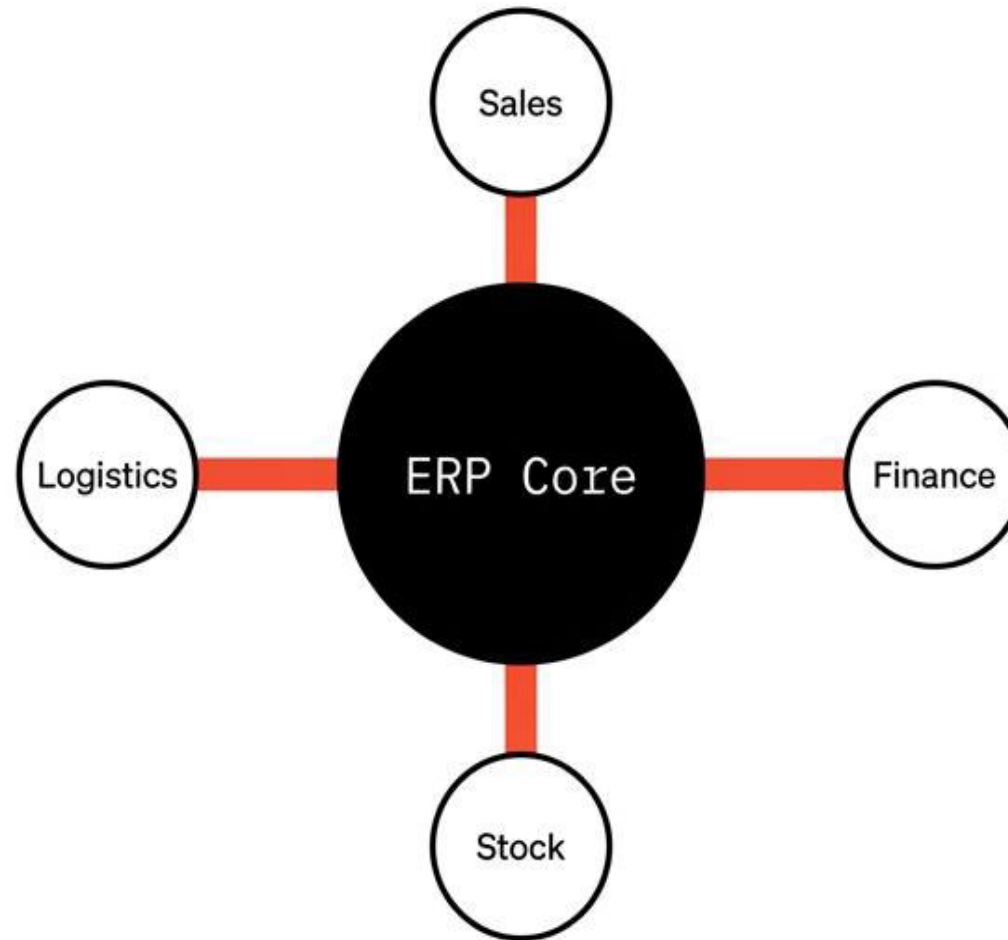

The Enterprise

You are the new operators of Ciputra Creative Fashion.

The Role

Transition from theoretical students to data-driven fashion-tech strategists by managing a live, real-world retail simulation.

Enterprise Resource Planning (ERP): The Central Nervous System

The integration of all siloed business functions into a single, unified, and uncompromised source of truth.

The Four Pillars of the Integrated Enterprise

Procurement ■

What we need.

Acquiring raw materials and inbound stock.

Inventory ■

What we have.

Managing precise stock levels in real-time.

Sales ■

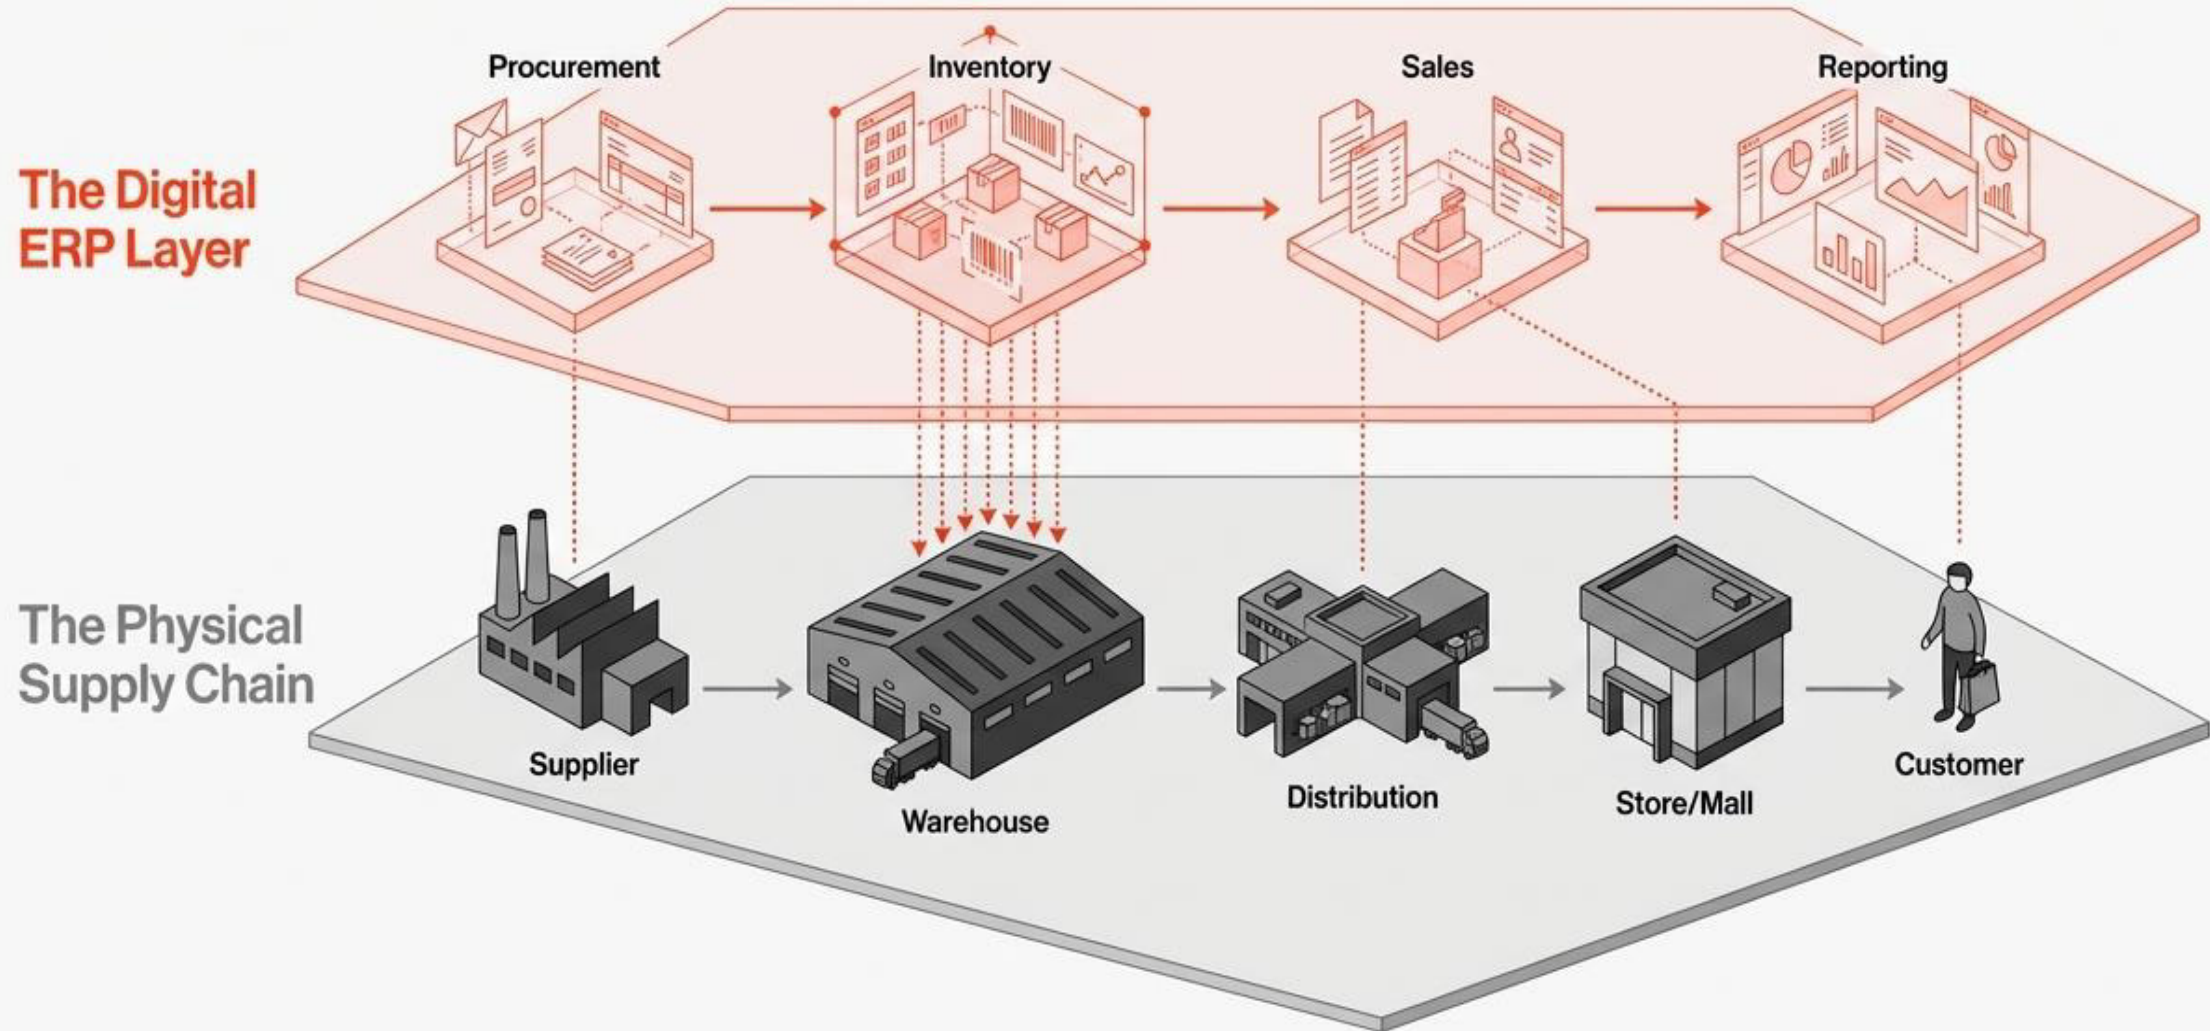

What we move. Handling customer transactions at the point of sale.

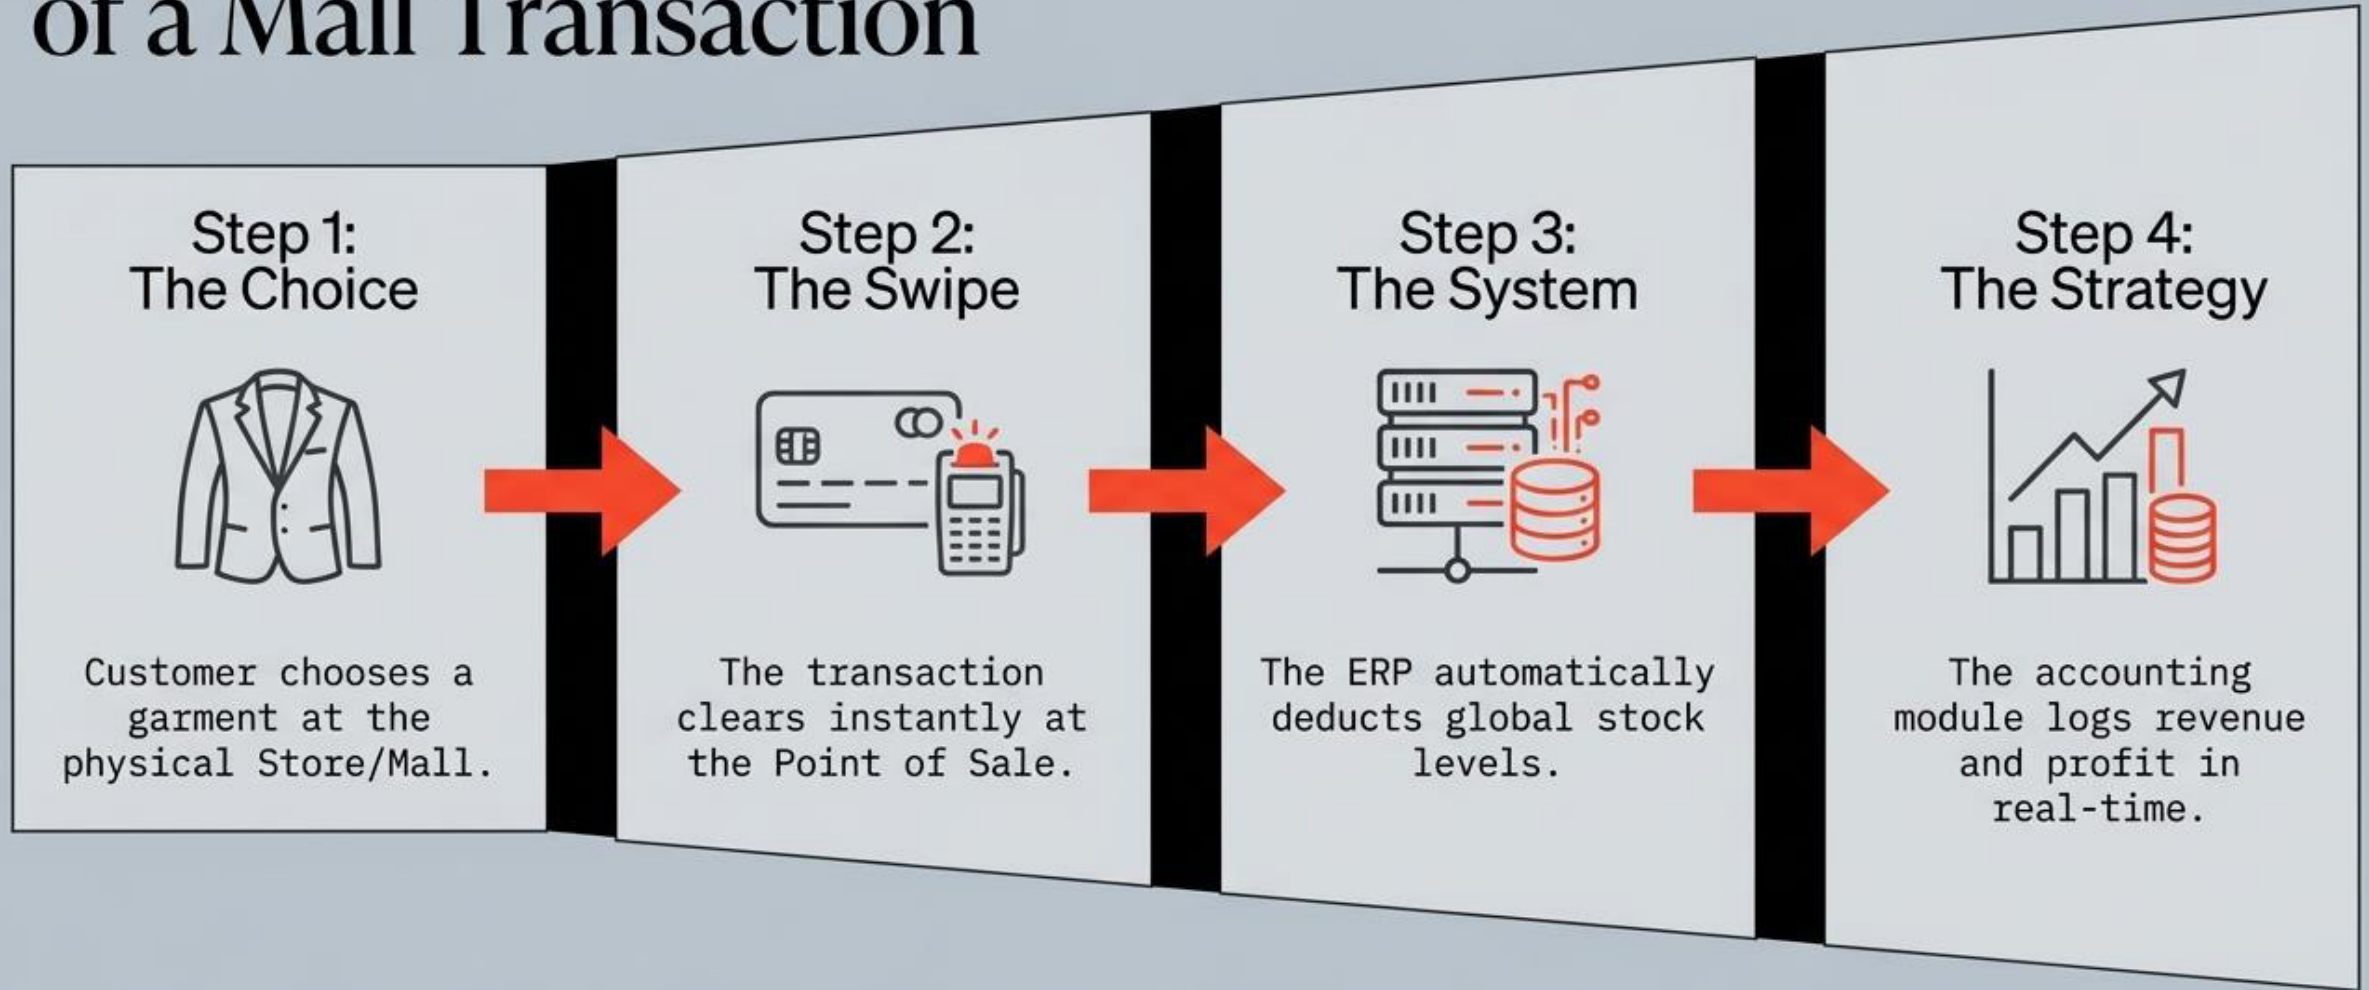

Accounting ■

What we make. Tracking financial health and overarching profitability.

Synchronizing Physical Actions with Digital Reality

The Butterfly Effect of a Mall Transaction

One swipe of a credit card triggers an immediate, automated reaction across the entire fashion enterprise.

Driving the Bottom Line with Real-Time Data

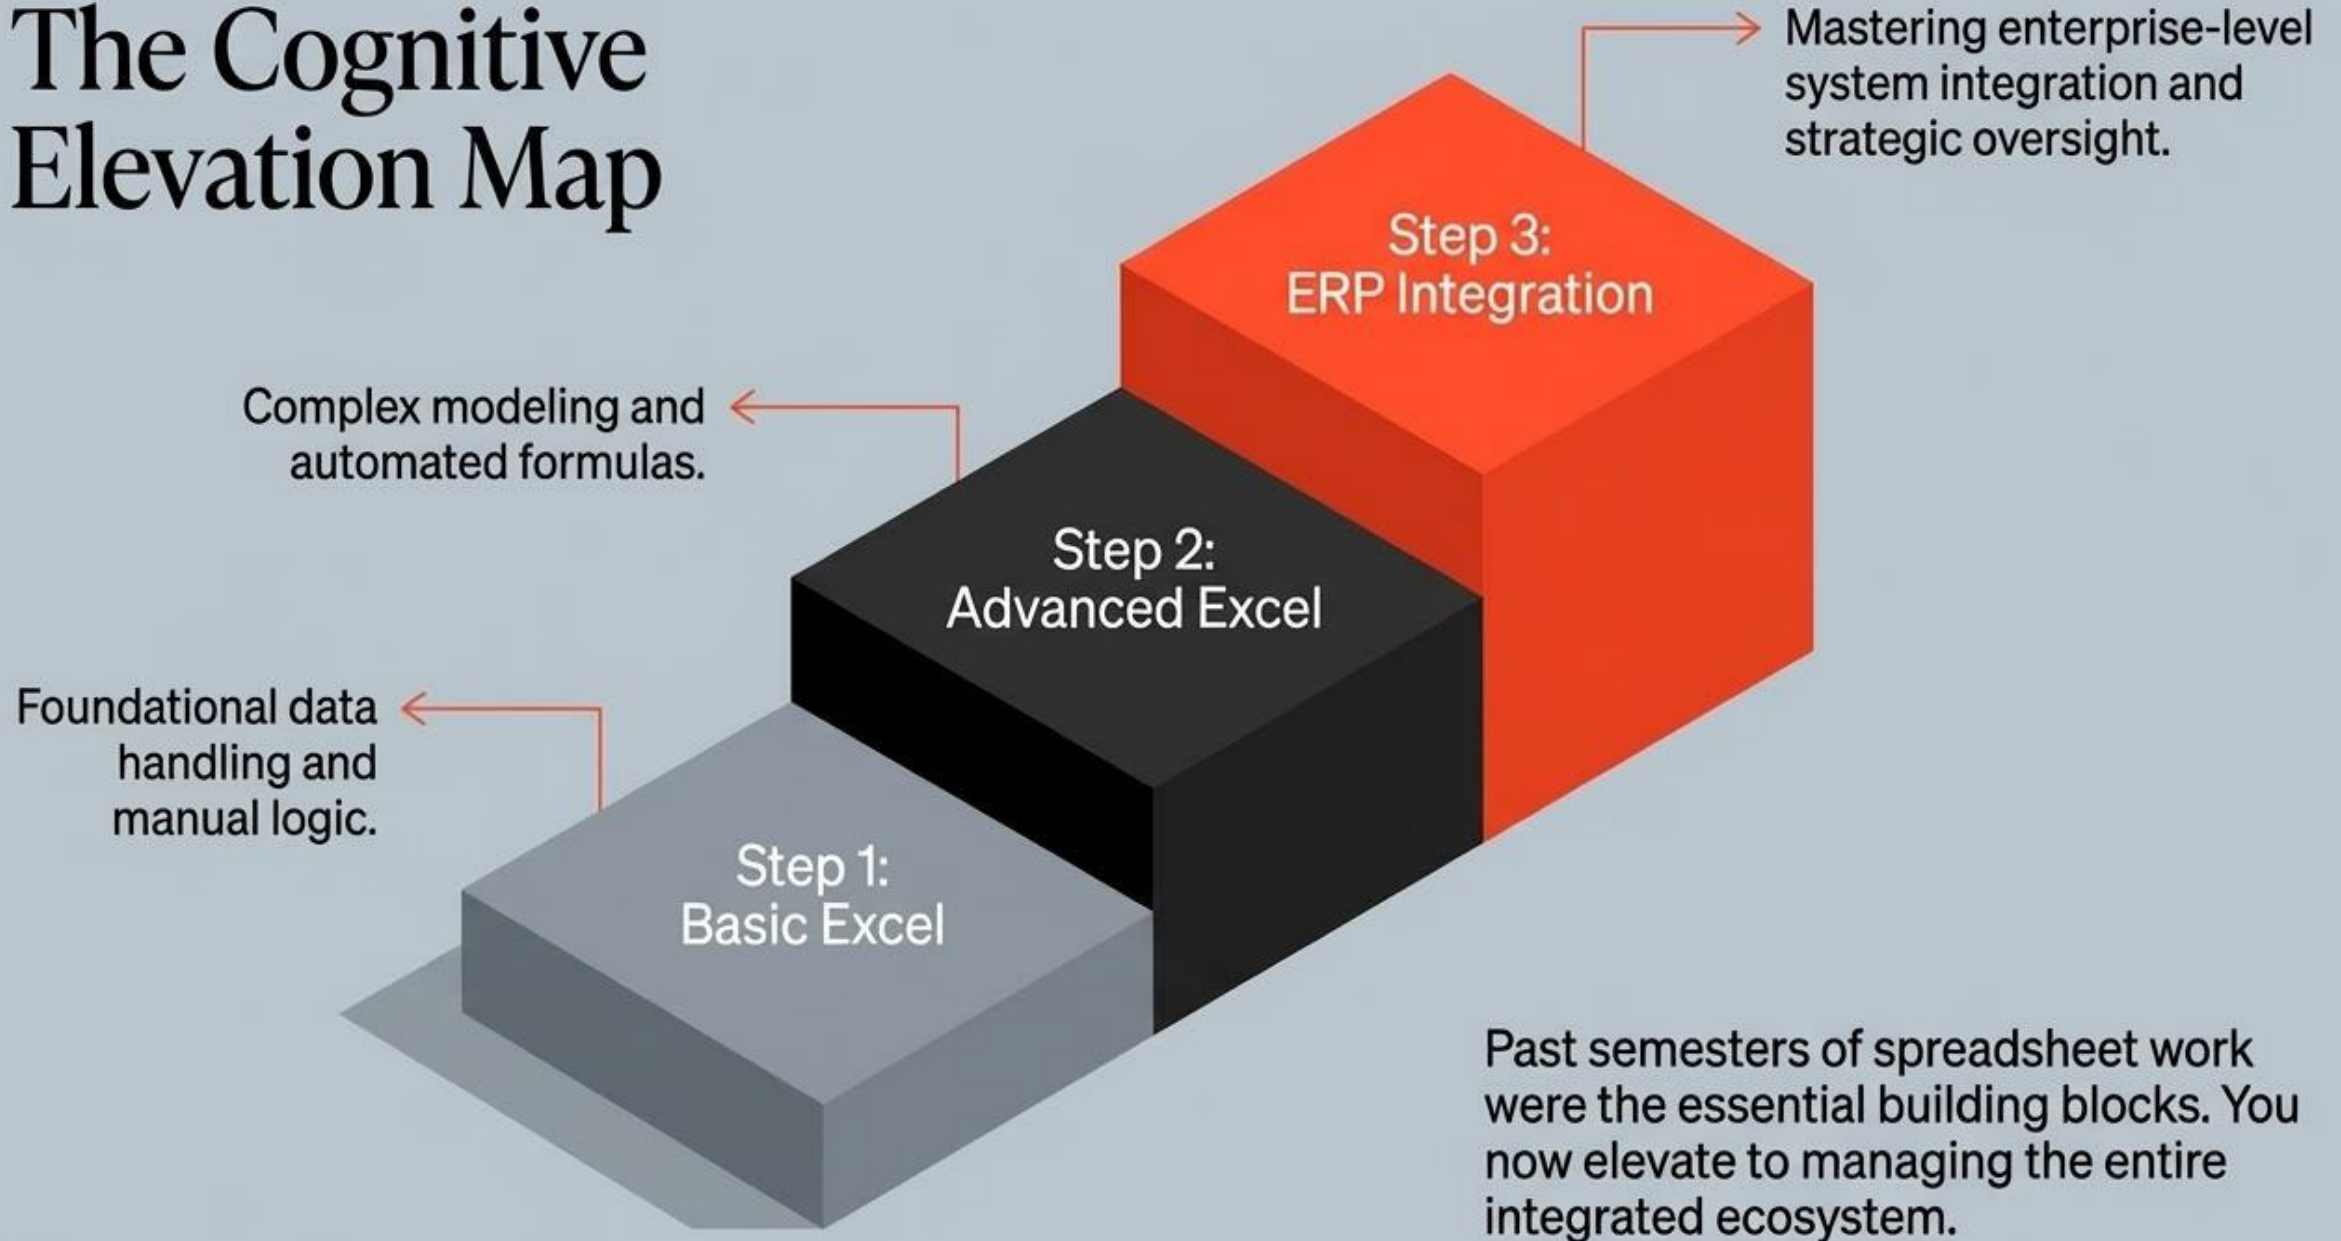

The Core Equation

Sales minus Costs equals Profit.

The Strategic Advantage

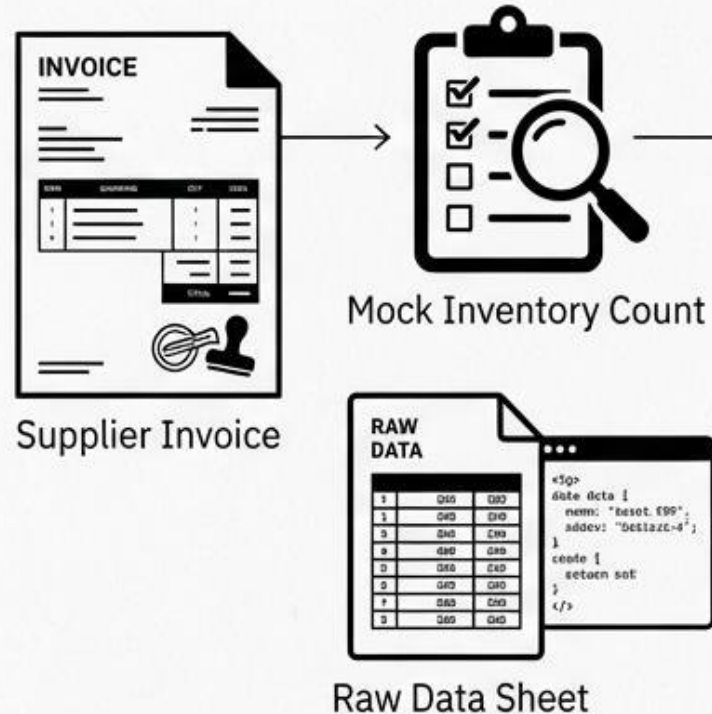

Real-time ERP data moves management from reactive, gut-feeling guesses to proactive, data-driven decision making.

The Cognitive Elevation Map

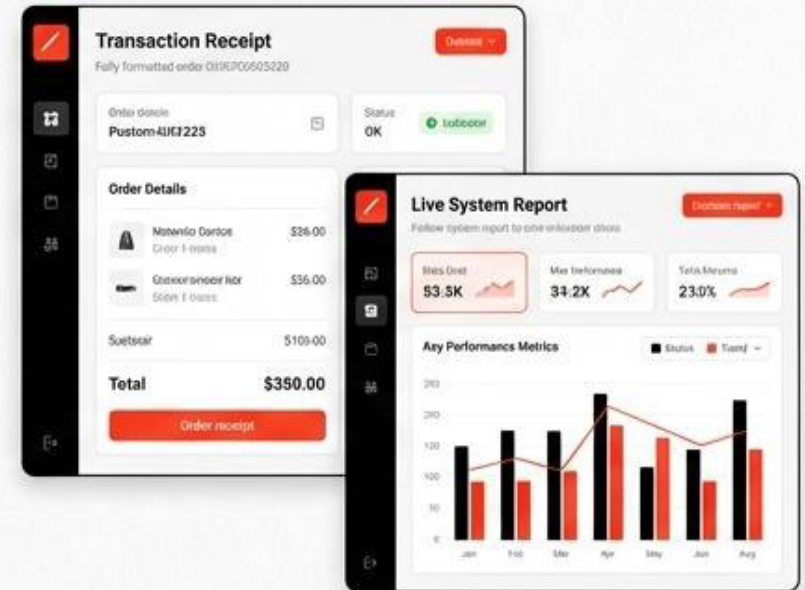

Executing the Enterprise Simulation

1. Simulate Real Inputs

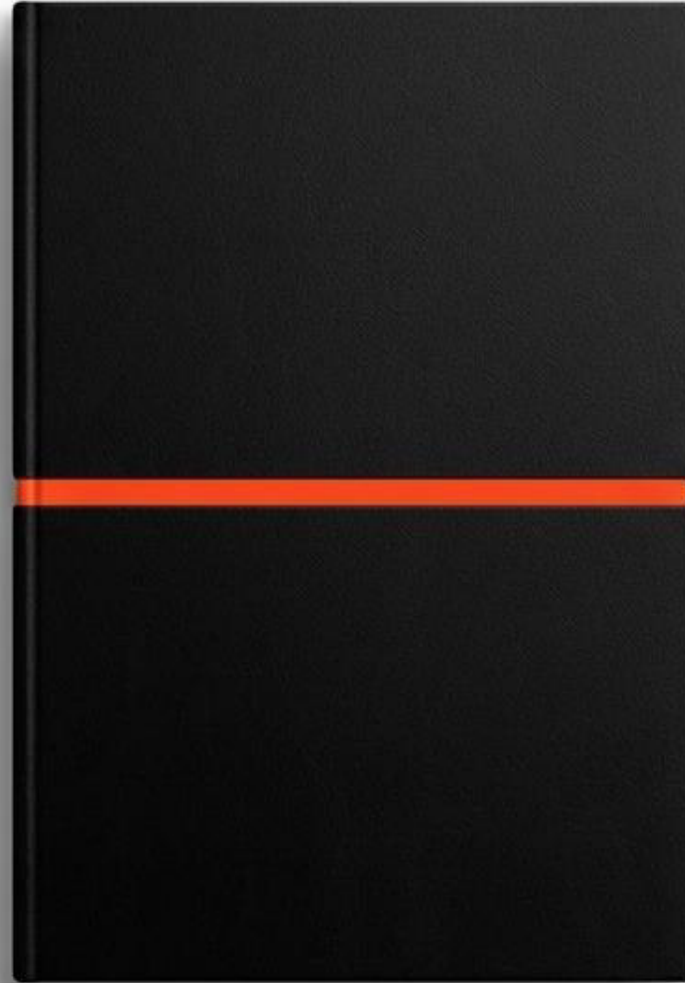

Automated
Execution within
Ciputra Creative
Fashion ERP

2. Extract Automated Reports

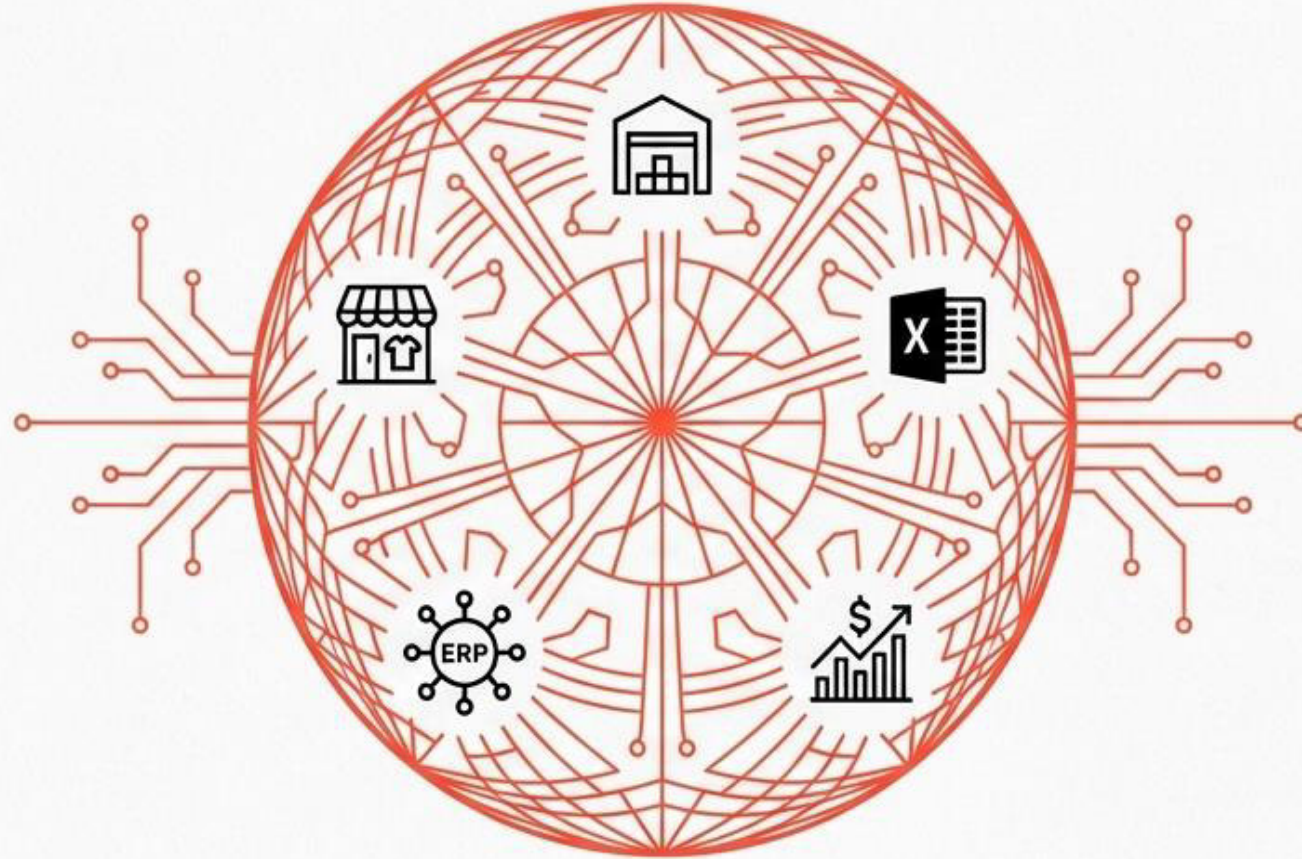

Your daily operations: Simulate live input data, execute daily business transactions, and extract automated reports.

The Capstone Evaluation

- The Ultimate Deliverable: A comprehensive business strategy report.
- The Criteria: Evaluation is not based simply on software clicks, but on generating, interpreting, and strategizing around the ERP data produced during your simulation.
- The Philosophy: The software tool serves the strategic business mind.

The Modern Fashion-Tech Professional

Technology does not replace the creativity of fashion; it amplifies it.

Graduates leave equipped with a ruthless competitive advantage rooted in integrated systems.

Welcome to the Digital Fashion
Industry. Let's build the system.

Best Assignment W6: Maria Devin Hans

*Presentasi di akhir sesi kelas.

PROJECT-BASED PEDAGOGY

Case Study: Scaling Up Chaos

Transformasi Digital & Implementasi ERP
pada 'Ciputra Creative Fashion'

Informasi adalah aset strategis, bukan sekadar data administratif.

Meet the Company: Ciputra Creative Fashion

- **Founder:** Alumni UC (Startup lokal)
- **Model Bisnis:** Fashion retail (D2C - Direct to Consumer)
- **Skala:** 5 Gerai Retail & 3 Gudang Distribusi

Insight: Pertumbuhan cepat membawa tantangan kompleksitas data yang besar.

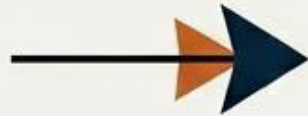

The Pain Points: Where Operations Fail

Data Silo

Gudang (Excel) $\neq$ Toko
(POS) $\neq$ Keuangan

Inventory Ghost

Barang ada di sistem,
fisik kosong

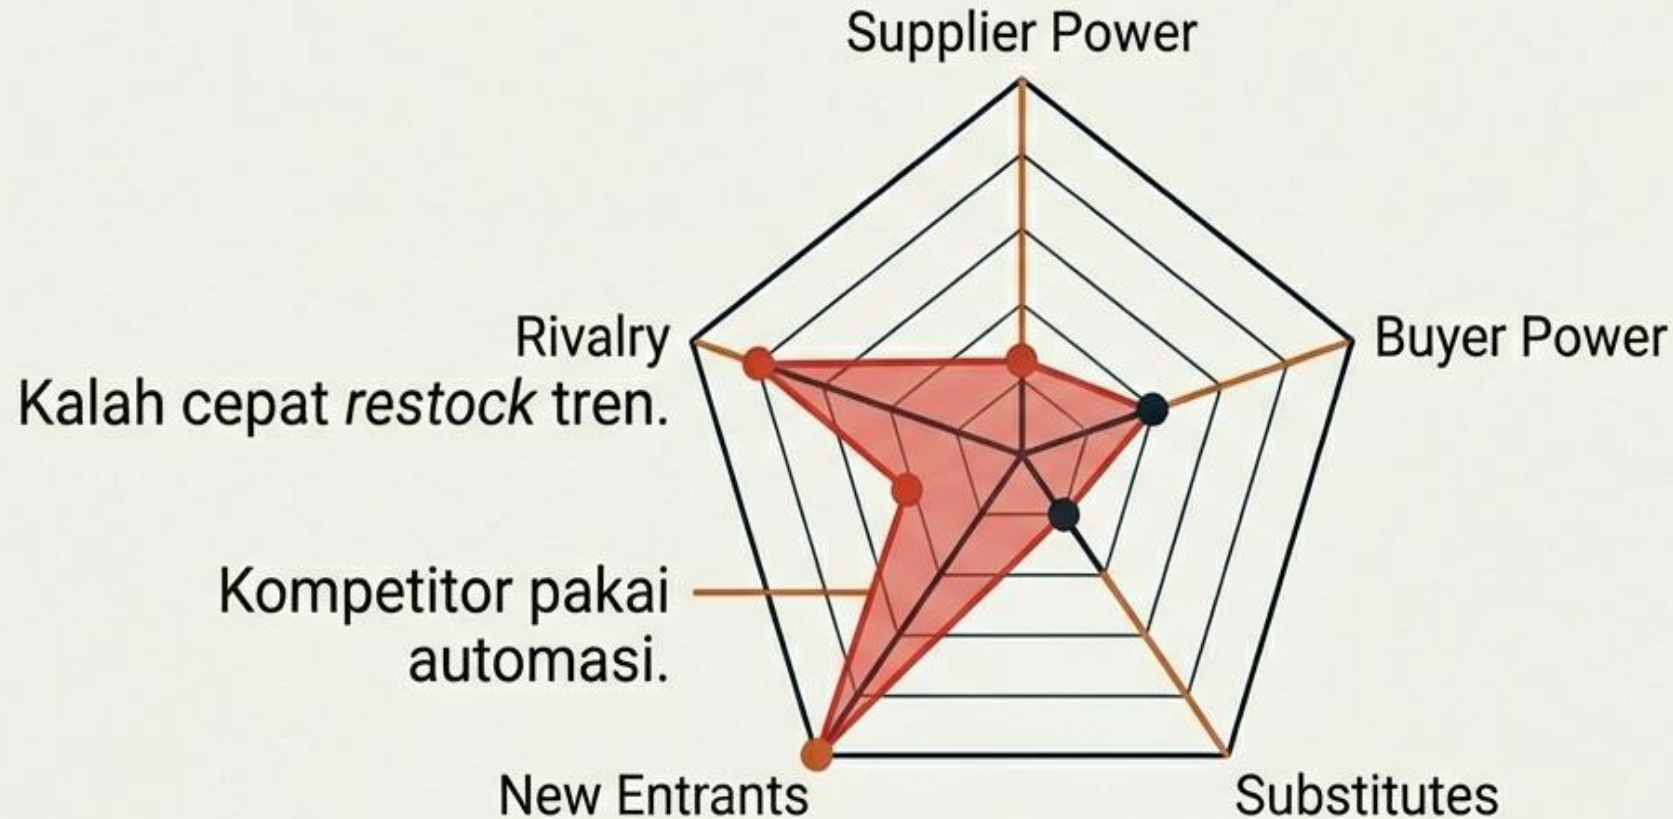

Financial Lag

Laporan 14 hari
(Terlambat)

Pernahkah bisnis Anda mengalami 'stok habis tapi pelanggan mau beli'?

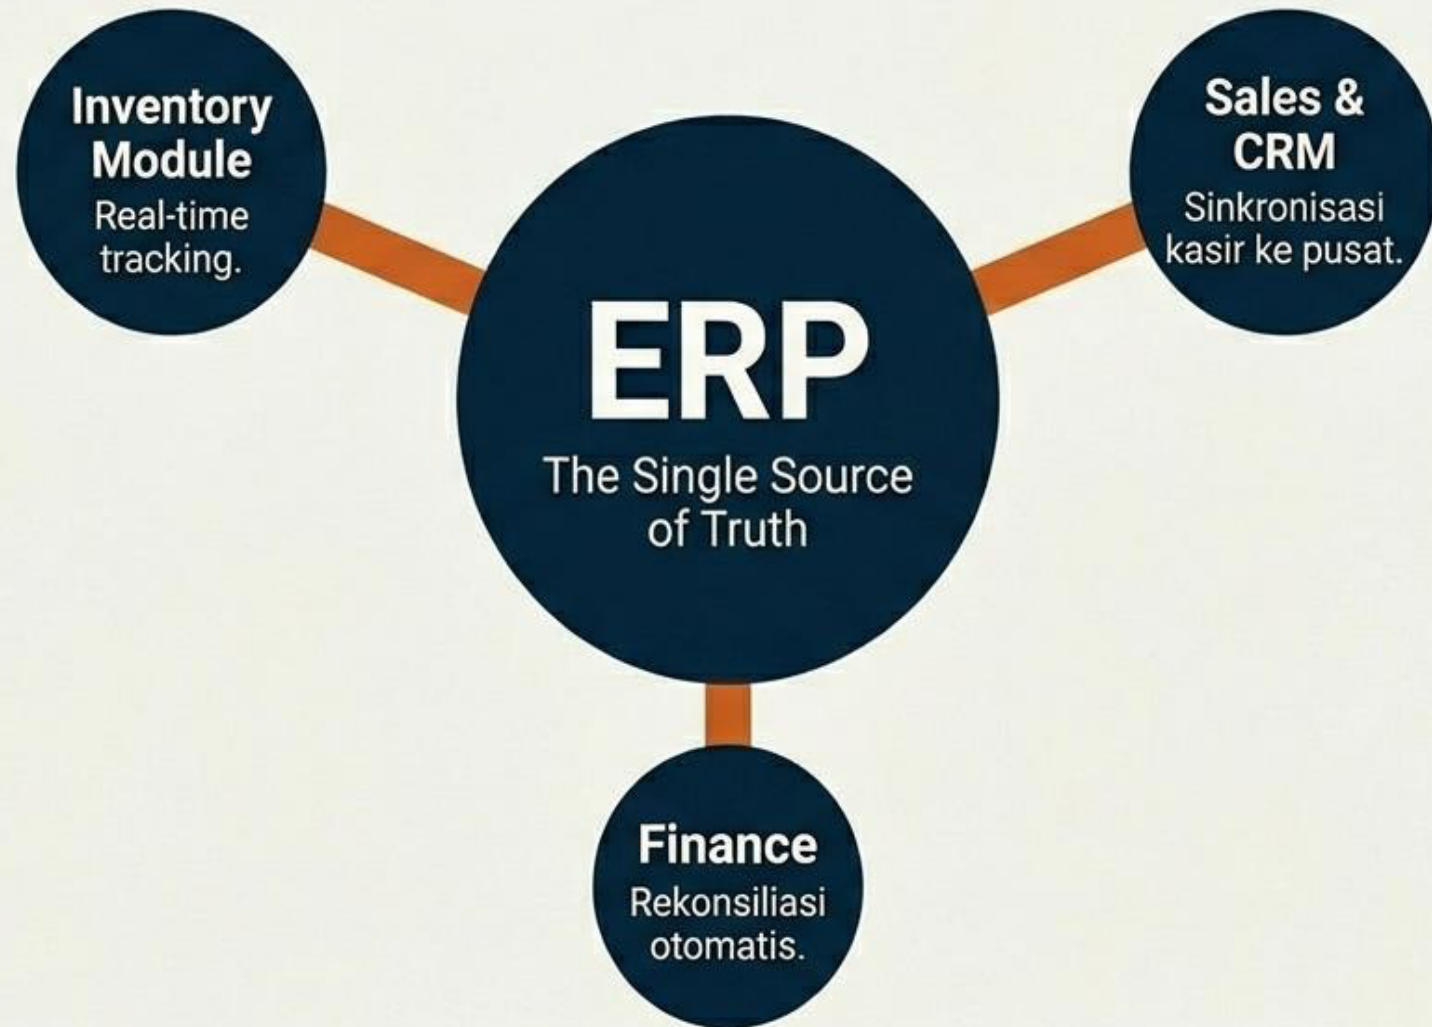

Why Information Systems are Strategic Weapons

MIS Week 7 Theory Application

Information System bukan sekadar pendukung, tapi **Strategic Weapon**.

The Solution: Enterprise Resource Planning

Group Task 1: Strategic Value Chain Analysis

Analisis Rantai Nilai (Critical Thinking)

Focus Question 1:
Focus Question 1: Di bagian mana ERP memberikan nilai tambah paling besar?

Focus Question 2:
Bagaimana integrasi data meningkatkan Customer Experience?

Group Task 2: Designing the Data Blueprint

Task: Rancanglah alur data sederhana.

Scenario: Gambarkan proses dari transaksi fisik hingga menjadi laporan keuangan.

Requirement: Identifikasi aktor yang terlibat.

Pelanggan beli
di Mall

Laporan Laba
Rugi Owner

Innovation: Accelerating ERP with AI

The CCPS Connection

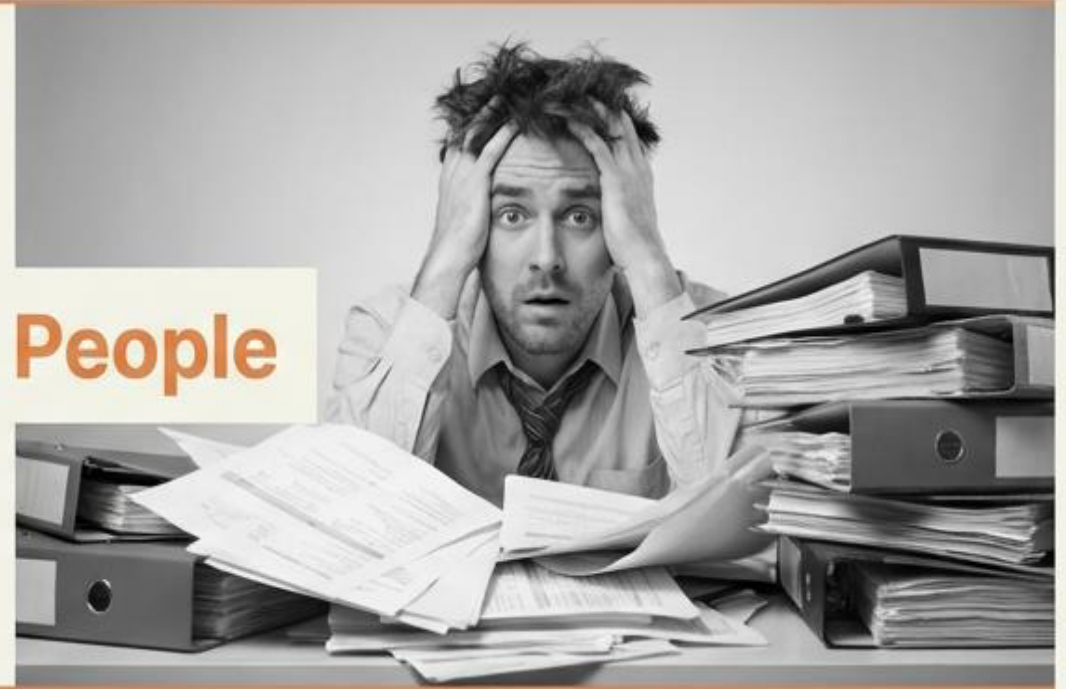

- Jika ERP sudah memiliki data, gunakan AI untuk inovasi.
- Example: Optimize delivery routes for 3 warehouses using AI reasoning.

The Human Element: Barriers to Change

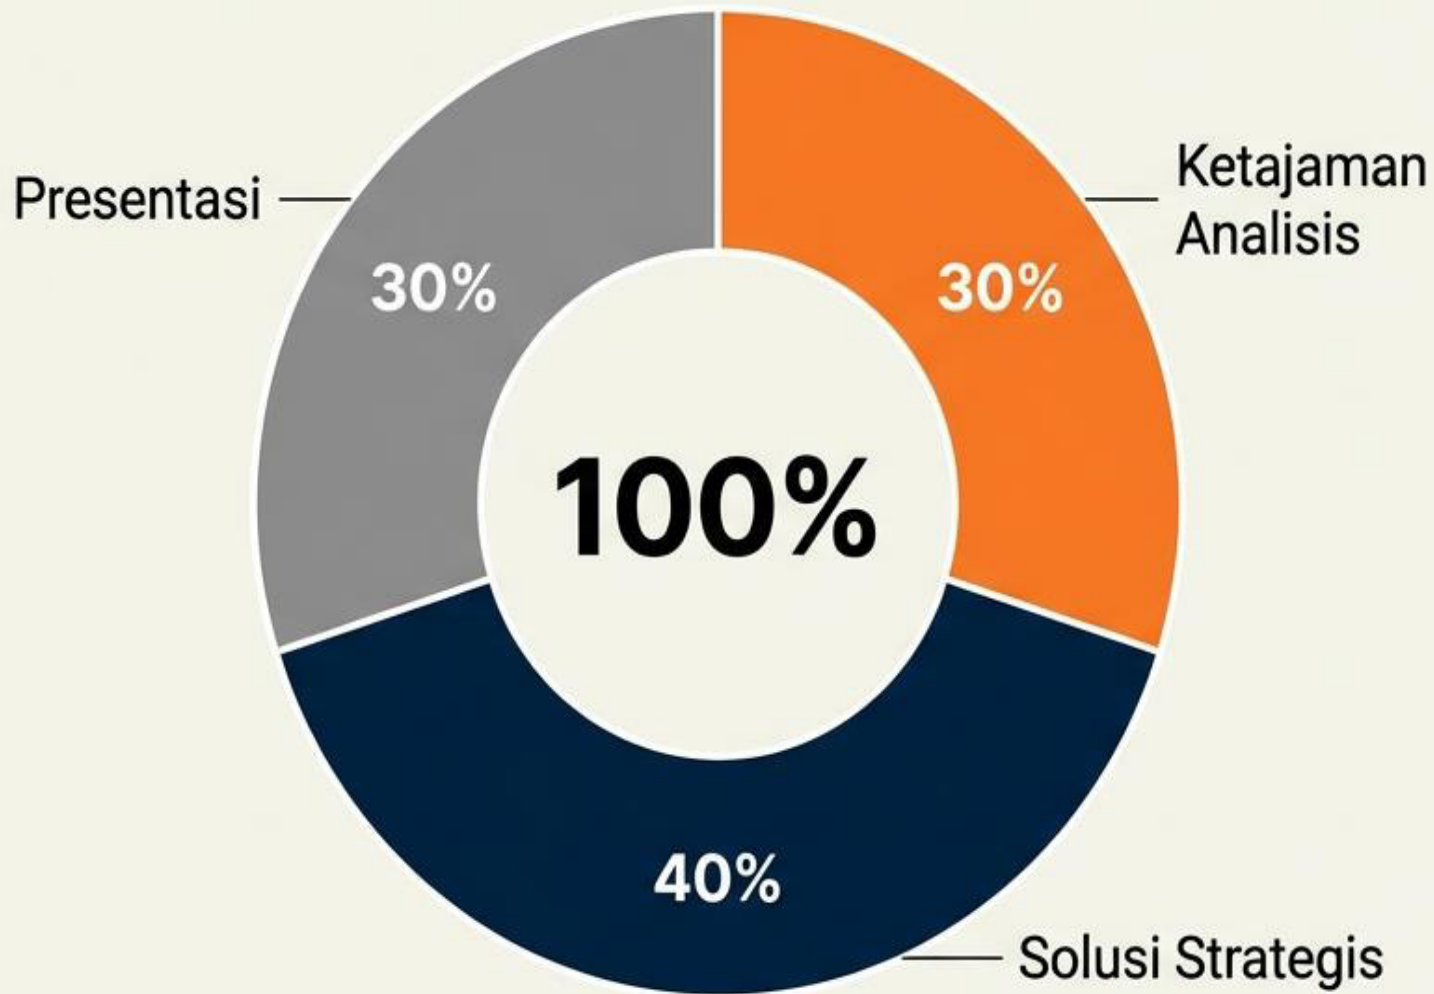

Technology vs. People

1. Bagaimana meyakinkan admin gudang untuk pindah dari Excel ke ERP?
2. Apa risiko jika implementasi dilakukan mendadak?

Core Truth: Implementasi sering gagal bukan karena teknologi, tapi manusia.

Assessment Rubric & Success Metrics

- **30% - Ketajaman Analisis:** Identifikasi masalah yang tepat.
- **40% - Solusi Strategis:** Desain modul ERP yang relevan.
- **30% - Presentasi:** Kemampuan komunikasi ide.

TASK Group work –

Terapkan: Teori Hari ini

- Detailkan Strategic value chain Analysis Perusahaan ini
- Buatkan alur Level 0, 1 dan 2 dari pelanggan dimall sampai laporan Laba Rugi Perusahaan.
- Terapkan Teori Is are Strategic weapon dan implement di perusahaan ini.

TASK SUBJECT: MIS-W7- Nama
Ketua

REPORT PPT/Canva Maksimum 35
Slides, font 12 minimum with
any images, Prompt, AI Used.
Deadline e-learn, Senin, 12 Siang.
